

The Wisconsin Veterinary Diagnostic Laboratory, at its Barron location, performs ELISA testing for Equine Infectious Anemia. The lab accepts three submission form types for testing. This document provides guidance for submission of each type.

### **APHIS Veterinary Services Process Streaming (VSPS)** *(electronic)*

VSPS provides a data repository for laboratory test submissions and results. Results are available via the VSPS portal within two business days, most reported on the same day as received. The VSPS repository is free of charge.

- Veterinarians obtain USDA Level 2 e-authentication by applying for a user ID and password at:  
<https://vsapps.aphis.usda.gov/vsps/>
- After you have received approval for your user ID and password, then you may submit test requests through the VSPS website.
- Use the website to set up your clinic, your veterinarian (including a valid National Accreditation Number), your client and all of the pertinent information regarding the animal being tested.
- Choose the Wisconsin Veterinary Diagnostic Lab (Barron) as the testing laboratory.
- **A COPY OF THE ELECTRONIC EIA FORM MUST ACCOMPANY YOUR SERUM SAMPLES.**
- The electronic eEIA form is filled out automatically.
- Log onto the VSPS website to receive results.

### **Global Vet Link** *(electronic)*

- Global Vet Link provides a data repository for laboratory testing submissions. Results are available within two business days, most reported on the same day as received, via the GVL portal. There is a fee for the GVL service.
- Obtain an account with Global Vet Link by registering at:  
<https://user.globalvetlink.com/public/signup.jsp>
- Use the website to set up your clinic, your veterinarian (including a valid National Accreditation Number), your client and all of the pertinent information regarding the animal being tested.
- Choose the Wisconsin Veterinary Diagnostic Lab (Barron) as the testing laboratory.
- **A COPY OF THE ELECTRONIC EIA FORM MUST ACCOMPANY YOUR SERUM SAMPLES.**
- Results are available electronically through the Global Vet Link website.

### **Official Federal VS Form 10-11** *(paper; ONLY the current version of Feb 2018 is valid)*

Only the USDA/APHIS "Equine Infectious Anemia Laboratory Test" form can be accepted. To request forms contact: USDA-APHIS VS Office at (515) 284-4140 and follow the Form Orders prompt.

- An individual form must accompany each animal's sample. The form must be completed in its entirety—common errors are leaving any cell blank, not indicating the date of draw, missing the veterinarian's signature, missing a valid National Accreditation Number and the label on the tube not matching the name indicated on the form. Failure to complete the VS Form 10-11 correctly and entirely may cause the sample to be rejected.
- Results are returned to the submitting veterinarian via US Postal Service on the day following testing.

Send samples and submission forms to:

WVDL-Barron  
1521 E. Guy Ave.  
Barron, WI 54812

For questions please contact the  
Wisconsin Veterinary Diagnostic Laboratory in Barron, Wisconsin  
at (715) 637-3151 or (800) 771-8387.

The EIA Antibody ELISA test is run daily with results within two business days, most reported on the same day as received.

The sample type required is 1ml of serum, refrigerated and shipped with cold packs.
